

# John Janclaes | 2016 Reading, Listening & Learning

"Books are what you step on to take you to a higher shelf. The higher your stack of books, the higher the shelf you can reach. Want to reach higher? Stack some more books under your feet! Reading is what brings us to new knowledge. It opens new doors. It helps us understand mysteries. It lets us hear from successful people. Reading is what takes us down the road in our journey. Everything you need for a better future and success has already been written."

- Jim Rohn
